Work Experience

Programming Teacher

CodeWizardsHQ, September 2023 - Current

- Responsible for instructing kids K-12 in a variety of programming topics within a dedicated classroom format.

Junior Web Developer

Oklahoma Lottery Commission, July 2021 - July 2022

- Tasked with implementation of total front end redesign of company website (see: <https://lottery.ok.gov/>), requiring a custom webpack/vue architecture to intermesh with legacy .Net Framework MVC 5 systems while maintaining old site.
- Designed and implemented an agency content delivery network on Microsoft Azure for launch of new website.
- Developed and implemented a custom content management system for the aforementioned new website via Vue/TineMCE.

Software Development Intern

Deep Fork Technology, Sep 2020 - Feb 2021

- Worked with Deepfork's first dedicated in-house development team on local per-client projects. Covering roles from system design and requirements gathering to DBA.
